State Teachers Retirement System of Ohio GASB 75 Example Journal Entries for Fiscal Year 2024

Amounts listed are for the STRS Ohio total plan level for fiscal year 2023

Note: The amounts in the employer journal entry should be computed using the employer's proportionate share percentage per the Schedule of Employer Allocations and the STRS Ohio plan level amounts in the journal entries below. The amortization template for deferred outflows and inflows may be used to calculate and support the values used in these entries and the resulting balances on the employer's financial statements including any deferred outflow or deferred inflow resulting from a change in proportionate share.
